Fall 2022 CSE 321 Operating Systems Lab Assignment 6

Total Marks: 20

Question 1 {10 Marks}

Write a program in c to detect if the system will face any deadlock in the future. If a deadlock is detected then print "Deadlock Ahead" otherwise print "Safe here". The situation is given below. (Allowed to use Banker's Algorithm).

Note: The code can be implemented in several different ways, but make sure the parameter remains the same as shown below.

```
 \begin{array}{l} n=5; \ /\!/ \ Number \ of \ processes \\ m=4; \ /\!/ \ Number \ of \ resources \\ int \ alloc[5][4]=\left\{\left\{0,1,0,3\right\}, \ /\!/ \ P0 \ /\!/ \ Allocation \ Matrix \\ \left\{2,0,0,0\right\}, \ /\!/ \ P1 \\ \left\{3,0,2,0\right\}, \ /\!/ \ P2 \\ \left\{2,1,1,5\right\}, \ /\!/ \ P3 \\ \left\{0,0,2,2\right\}; \ /\!/ \ P4 \\ \end{array} \\ int \ max[5][4]=\left\{\left\{6,4,3,4\right\}, \ /\!/ \ P0 \ /\!/ \ MAX \ Matrix \\ \left\{3,2,2,1\right\}, \ /\!/ \ P1 \\ \left\{9,1,2,6\right\}, \ /\!/ \ P2 \\ \left\{2,2,2,8\right\}, \ /\!/ \ P3 \\ \left\{4,3,3,7\right\}; \ /\!/ \ P4 \\ \end{array} \\ int \ avail[4]=\left\{3,3,2,1\right\}; \ \ /\!/ \ Available \ resources \\ \end{array}
```

Question 2 {10 Marks}

Write a c program that will generate the safe sequence of process execution for the situation given below: (Use Banker's Algorithm).

Note: The code can be implemented in several different ways, but make sure the parameter remains the same as shown below.

```
 \begin{array}{l} n=6; \mbox{// Number of processes} \\ m=4; \mbox{// Number of resources} \\ \mbox{int alloc}[6][4]=\{\{\,0,\,1,\,0,\,3\,\}, \mbox{// P0}\mbox{// Allocation Matrix} \\ \{\,2,\,0,\,0,\,3\,\}, \mbox{// P1} \\ \{\,3,\,0,\,2,\,0\,\}, \mbox{// P2} \\ \{\,2,\,1,\,1,\,5\,\}, \mbox{// P3} \\ \{\,0,\,0,\,2,\,2\,\}, \mbox{// P4} \\ \{\,1,\,2\,,\,3,\,1\,\}\,\}; \mbox{//P5} \\ \mbox{int max}[6][4]=\{\,\{\,6,\,4,\,3,\,4\,\}, \mbox{// P0}\mbox{// MAX Matrix} \\ \{\,3,\,2,\,2,\,4\,\}, \mbox{// P1} \\ \{\,9,\,1,\,2,\,6\,\}, \mbox{// P2} \\ \{\,2,\,2,\,2,\,8\,\}, \mbox{// P3} \\ \{\,4,\,3,\,3,\,7\,\}, \mbox{// P4} \\ \{\,6,\,2\,,\,6,\,5\,\}\,\}; \mbox{//P5} \\ \mbox{int avail}[4]=\{\,2,\,2,\,2,\,1\,\}; \mbox{// Available resources} \\ \end{array}
```
